Summary

Currently in my third year of a Computer Science Engineering program. Proficient in C++, Java, and JavaScript, with a focus on full-stack development. Enthusiastic about learning new technologies and seeking opportunities to apply my skills in real-world projects.

Education

Higher Secondary Pingla Krishna Kamini Institution	2021-2022
B.E CSE Chitkara University	2022-2026

Experience

Website Project: Crop Recommendation

- Developed a website called "Crop Recommendation" designed to analyze weather, soil, humidity, and temperature data to recommend suitable crops.
- Collaborated with a team of three peers to build the website.
- Focused on backend development and data collection.
- Integrated data processing algorithms to provide accurate crop recommendations.

AR/VR Project: Furnishe AR

- Project Overview: Developed an AR/VR application named "Furnishe" that allows users to visualize furniture in their space using augmented and virtual reality technologies.
- Role: Backend Developer and Data Manager
- Responsibilities:
 - Worked with a team to design and implement the backend infrastructure.
 - Collected and managed 3D model data of furniture items.
 - Ensured seamless integration of AR/VR features for an immersive user experience.
